

OUR INSURANCE POLICY

Dr. Steven Lee has established what we feel to be reasonable and competitive fees for our services in the geographical area. We give our patients a surgical estimate so that you may check with your insurance carrier to see what will be paid.

If you should receive a letter from your insurance carrier stating our fee is above their usual, customary and reasonable payment amount, your carrier may have set a ceiling or limit on various procedures. What your insurance carrier may not tell you is that other carriers may pay our charge in full.

Most insurance companies pay our full fee with few exceptions. Therefore, we feel our fees are within the reasonable and customary range for this geographic area.

We feel it is unfair for an insurance carrier to imply that we have mistreated you by overcharging for services rendered. This often places the doctor in a sensitive situation, which could damage the patient/doctor relationship. We are very conscious of our charges and our commitment to you.
